Appendix O   Examples

Note that these examples were generated using prototype tools and are intended to be used for general overview only. The emphasis is *not* on the individual bytes (e.g., capitalization or exact keywords). Normative examples will be provided at http://www.CIP4.org when available.

Note: pay special attention to JDF XJDF tags that are orange and/or JDF XJDF attribute names that are magenta.

O.1   Formatting Sample Test

This example is to be removed: it is a temporary test for automatic example formatting. It has been imported using the following settings:

- Import Text Flow by Reference
- Flow to Import - Body Page Flow A (Main Flow)
- Formmating of Imported Flow - Reformat Using Current Document's Formats
- Updating of Imported Flow - Automatic

Then framemakers paragraph formatting Sample_code01 has been used, but all Sample_codexx seem to work.

Example O-1: sample.rtf

```
<!-- Single line -->

<!-- multi
    line 5
    comment -->
<RunList Class="Parameter" ID="Link0003" LogicalPage="5" Pages="0 ~ -1"
        PartIDKeys="Run" Status="Available">
    <RunList Run="2">
        <LayoutElement>
            <FileSpec URL="File:///File2.pdf"/>
        </LayoutElement>
    </RunList>
</RunList>

<RunList Class="Parameter" ID="Link0003" LogicalPage="5" Pages="0 ~ -1"
        PartIDKeys="Run" Status="Available">
<RunList Run="2">
    <LayoutElement>
        <FileSpec URL="File:///File2.pdf"/>
    </LayoutElement>
</RunList>
</RunList>
```

Note loss of color

Example O-2: samplea.rtf

This sample has been modified by replacing \par at the end of each line (making them all paragraphs) with \line making the whole sample one paragraph with line breaks.
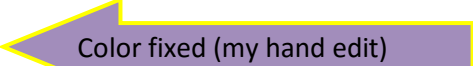

```
<!-- Single line -->

<!-- multi
    line 5
    comment -->
<RunList Class="Parameter" ID="Link0003" LogicalPage="5" Pages="0 ~ -1"
        PartIDKeys="Run" Status="Available">
    <RunList Run="2">
        <LayoutElement>
```

```
                  <FileSpec URL="File:///File2.pdf"/>
            </LayoutElement>
        </RunList>
    </RunList>

    <RunList Class="Parameter" ID="Link0004" LogicalPage="5" Pages="0 ~ -1"
            PartIDKeys="Run" Status="Available">
    <RunList Run="2">
        <LayoutElement>
            <FileSpec URL="File:///File42.pdf"/>
        </LayoutElement>
    </RunList>
    </RunList>
```

Color fixed (my hand edit)

Example O-3: sample-highlight-cip4colors.rtf

```
    <!-- Single line -->

    <!-- multi

        line 5

        comment -->

    <RunList Class="Parameter" ID="Link0003" LogicalPage="5" Pages="0 ~ -1"

            PartIDKeys="Run" Status="Available">

        <RunList Run="2">

            <LayoutElement>
```

Too much whitespace

```
                <FileSpec URL="File:///File2.pdf"/>

            </LayoutElement>

        </RunList>

    </RunList>

    <RunList Class="Parameter" ID="Link0003" LogicalPage="5" Pages="0 ~ -1"

            PartIDKeys="Run" Status="Available">

    <RunList Run="2">

        <LayoutElement>

            <FileSpec URL="File:///File2.pdf"/>

        </LayoutElement>
```
